

JCW CURTAIN WALLING

Aluminium curtain walling system for low-rise commercial and residential façades.

JCW is an aluminium curtain walling system designed for low-rise applications where performance, ease of installation and clean façade design are required.

Developed for commercial, residential and public sector projects, the system provides a practical glazing solution with consistent performance and efficient installation.

Key Benefits

- Designed for low-rise curtain walling applications
- 50mm sightlines for consistent façade design
- Clip-in plate, ladder system for efficient installation
- Compatible with acoustic glazing
- Suitable for a wide range of building types

Applications

Commercial • Residential • Education • Retail • Public-sector

Suitable for buildings up to 13m

50mm sightlines

Clip-in plate ladder system

Glazing up to 32mm

Wind resistance tested to 2400Pa

One systems house.

Multiple accredited solutions.

JCW is a curtain walling system developed for low-rise building applications where reliability, ease of installation and façade consistency are key requirements.

The clip-in ladder system supports efficient installation and factory preparation before delivery to site. With slim 50mm sightlines and compatibility with a range of glazing options, JCW supports modern building design across commercial, residential and public-sector projects.

JCW integrates with Jack Aluminium door and window systems to support complete building envelope design.

Key Features

- 50mm sightline curtain wall system
- Clip-in plate ladder system
- Three mullion and transom options
- Transom drainage design
- Compatible with acoustic glazing
- Designed for efficient installation

Performance and Specification

- JCW integrates with Jack Aluminium door and window systems to support complete building envelope design.
- Tested to BS 6375-1
- Air permeability: 600Pa
- Water tightness: 600Pa
- Wind resistance: 2400Pa
- Exposure category: 2400
- Glazing options up to 32mm
