

SD70 HERITAGE DOOR

Slimline aluminium door system for heritage and design-led projects.

SD70 is a thermally broken aluminium door system designed to deliver slim sightlines and heritage-style aesthetics with modern performance.

Suitable for residential, refurbishment and design-led commercial projects, it provides a practical aluminium alternative to traditional steel-look systems.

Applications

Residential • Heritage Projects • Refurbishment • Commercial Interiors

Key Benefits

- Slim profiles and lockhousing for steel-look aesthetics
- Suitable for internal and external use
- Developed for heritage, refurbishment and design-led projects
- Strong thermal performance for modern compliance
- Compatible with SW60 and TW70 window systems

U-values from
1.3 W/m²K

One systems house.

Multiple accredited solutions.

SD70 is a thermally enhanced aluminium door system developed to replicate traditional steel-style doors.

The system is suitable for both external and internal applications, including heritage refurbishments, residential projects and commercial interiors where slim sightlines are required.

With flexible configurations and compatibility, SD70 suites with SW60 and TW70 for consistent system design.

Key Features

- Slim sightline aluminium profiles
- Internally glazed system
- Multi-point locking and barrel hinges
- Fully mitred construction

Hardware and Configuration

- Open in and open out
- Single and double doors
- Compatible with SW60 and TW70 window system to create sidelights and windows

Performance and Specification

- U-values from 1.3 W/m²K
- Frame depth: 70mm
- Glazing: 28 to 36mm

Tested Sizes

- Single: 1100mm (W) × 2500mm (H)
- Double: 1800mm (W) × 2500mm (H)

Fabrication and Installation

- Designed for efficient fabrication
- Compatible with standard glazing processes
- Suitable for internal and external installation
