

TRL90 ROOFLIGHT SYSTEM

Flat aluminium rooflight system for residential and commercial buildings.

TRL90 is a flat aluminium rooflight system designed to maximise natural daylight while delivering strong thermal performance and a clean architectural finish.

Suitable for both residential and commercial applications, it provides a practical solution for roof glazing across new-build and refurbishment projects.

Key Benefits

- Designed to maximise natural daylight throughout buildings
- Flush design for modern rooflight aesthetics
- Suitable for retrofit and new-build applications
- Double and triple glazing compatibility
- Designed for efficient fabrication and installation

Applications

Residential • Extensions • Commercial •
Education • Retail

Frame U-value from
1.0 W/m²K

Double and triple
glazing options

Flush architectural
finish

Suitable for new-
build and retrofit

One systems house.

Multiple accredited solutions.

TRL90 is a flat aluminium rooflight system developed to provide high levels of daylight performance alongside strong thermal efficiency.

Designed for use across residential and commercial buildings, the system supports modern architectural design where clean rooflines and increased natural light are key requirements.

With a fully bonded glazing construction and compatibility with double and triple glazed units, TRL90 delivers strength, durability and reliable performance. TRL90 can be specified alongside Jack Aluminium glazing systems for consistent building design.

Key Features

- Flush rooflight design
- Fully bonded glazing system
- Compatible with double and triple glazing
- Clean architectural appearance
- Suitable for residential and commercial use

Performance and Specification

- Frame U-values from 1.0 W/m²K
- Double and triple glazing options
- Suitable for walk-on applications
- Fully bonded glazing system
- Flush architectural finish
